MU2

Micro-details are masked by classic conversion.
Our discrete DAC design reveals the hidden beauty.
*MU2: **true integration yields true quality**.*

driven to improve

When you combine a class leading streamer with Roon Core,
a groundbreaking DA converter and a reference quality
analog pre-amp in one box, nothing is left to desire.

Grimm | *AUDIO*

MU2 | Grimm

We are convinced that smart integration of functions yields higher audio quality. The MU2 combines a music streamer with a superb DAC and a reference quality analog pre amp. Its built-in DAC takes full advantage of the Grimm Audio low jitter clock and high performance FPGA processor. A relay based analog volume control enables the MU2 to become the true 'hub' of your hifi system for both digital and analog sources. Just like with its sister product, the 'digital output' MU1, a Roon Core server is on board so no external computer is needed to enjoy perfect streaming.

At the heart of the MU2, Grimm Audio's proprietary *Major* DAC can be found. It is of a groundbreaking discrete design that makes optimal use of our own FPGA board. In a unique way our high resolution Pure Nyquist upsampling filters are combined with a fundamentally flawless 11th order noise shaper of 1.5 bit. If you like to read more about this technology, please check out the *Major* DAC blog at our website.

As a result the MU2 reproduces micro-details so well that it allows a deep emotional connection to the musical performance. The stereo image is of groundbreaking quality. Its serenity invites prolonged listening sessions.

If you love your loudspeakers and power amplifiers but long for a fundamental update in sound quality and streamer experience, the MU2 is designed for you.

Features

- Roon Core and Roon End Point integrated
- FPGA based discrete *Major* DA converter
- Ultra low clock jitter
- Relay based analog volume control
- Digital AES, S/PDIF and optical inputs
- Analog XLR and RCA inputs
- Analog XLR and RCA outputs
- Headphone output
- All sample rates and formats supported
- Internal SSD, external USB and NAS storage
- Tidal and Qobuz support
- Infrared remote control
- 5 year limited warranty
- 355 x 85 x 295mm (WxHxD)
